

SKIN TIGHTENING, CONDITIONING AND TONING FOR THE BODY, FACE AND EYES

I'd like to introduce the latest in Non-Surgical Face Lifting, fat reduction, stretch mark reduction, cellulite reduction, lip plumping, hand rejuvenation, body tightening & skin conditioning treatments. PureLift+ gives the results you've always dreamt of!

The PureLift+, is the ultimate multifunctional face & body, Inch Loss and Aesthetic platform using Radio Frequency, 4D Ultrasound Cavitation, Bio Microcurrent and Photon LED Light Therapy.

Radio Frequency (RF) treatment works by shrinking existing collagen tissue, providing an immediate tightening and plumping effect. Old, fibrous collagen is denatured and broken down by the body. Fibroblasts (the cells that create new collagen) are stimulated to create new, fresh, supple collagen.

The end result is volume of collagen, increases in a more organised structure and Elastin is strengthened and reinforced. This reduces the appearance of fine lines and wrinkles, whilst also providing tighter, plumper firmer feeling skin. Altogether a more youthful, supple and smoother complexion is achieved!

The laying down of fresh, new collagen fibres result in skin remodelling, taking place over 3-6 months and lasting up to two years.

4D Ultrasound Cavitation transmits sound wave energy into the sub-dermal tissues, targeting the area immediately beneath the treatment head which then impacts the fat cells, driving out the fat cell content, allowing them to be processed & eliminated safely & naturally by the body.

Perfect at treating stubborn fat, hard fatty deposits and Cellulite! Within 48 hours after treatment, undertaking some form of (preferably cardio vascular) exercise to raise your heart rate, therefore increase your metabolic rate, will ensure you retain the results delivered during the treatment.

Your body will use the fuel available in your blood stream. Once the “fuel” in the bloodstream has been used up, your Liver will begin to target the remaining fat deposits (starting with those most easily broken down – the treated areas) for further “fuel”.

Therefore, the more exercise you undertake between treatments, the better your results will be! 4D Cavi Inch Loss is a fantastic means of “reminding” your body about those long dormant fat deposits that no amount of exercise seems to be able to target.

Unlike older mono-polar and bi-polar technologies such as Accent and Thermage, the PureLift+ combines targeted multi-polar RF with advanced control circuitry and now incorporating result-enhancing red LED light at 630-650nm for improved efficacy. This is implemented alongside Bio Micro-Current eye lifting technology for the power to combat ageing over the whole face and body. This is why we find 4D Cavi delivers simply astonishing results for such a wide variety of clients!!! Even if you’ve tried other ultrasonic cavitation treatments before (such as 3D Lipo, or Cavi Sculpt), they simply can’t compare to the amazing results we can achieve with our all new 4D Cavi treatments!

Bio Micro-Current

Exercises the small muscles around the eyes through micro-triggering of the muscles. This stimulates strengthening of the muscle fibres resulting in a firmer muscular structure around the eyes. Bio micro current also Improves the health & vitality of cells, provides an immediate plumping & tightening effect, breaks down old collagen, Fibroblasts (new collagen) are stimulated and Improves blood circulation.

Photon LED Light Therapy

The LED face mask treatment works on the skin at the cellular level, targeting a variety of skin issues – acne, ageing, rosacea and pigmentation. Transforming the skin from the inside out. LED photon therapy has been thoroughly tested, evaluated and validated by hundreds of universities, medical labs and NASA. It is a new and emerging therapy in the beauty industry that uses the natural healing power of light. Exposing light to the skin surface activates the skins photoreceptors and lets the skin cells absorb its energy. It accelerates cell biochemical circulation and stimulates the production of collagen among other processes.

The **PureLift+** system treats:

4D Cavi For Rapid Inch Loss (body fat, arms - bingo wings, legs, hip, buttocks, stomach, mummy tummy, flanks, back, men's breast)

Radio Frequency Facial Skin Tightening (forehead, cheeks, jowls, double chin, crepe neck, décolletage chest, lines & wrinkles)

Bio micro-current Eye Skin Tightening (hooded eye lift, eye brow lifting, eye bags, crow's feet, under eye circles)

Radio Frequency Body Skin Tightening (stomach, mummy tummy, arms- bingo wings, flanks, back, buttocks, legs, décolletage - chest, hands, knees, Post-pregnancy body fat

Radio Frequency Lip Plumping & Hand Plumping

Stretch Mark Reduction
Photon LED Light Therapy
7 Colours - to reduce pigmentation, redness, rosacea and capillaries.
Collagen promotion
Acne reduction therapy
Skin Conditioning,
Skin Toning and Skin Firming
Prices start from £30 for single treatments and and £150 for courses.
Full treatment price list available on request.
